

Dear FCC, I subscribe to XM radio because they offer a service that no one else cares to offer. If you live in an area that does not carry the broadcast you want to hear, that's just too bad. Your favorite programming can be pulled for another format overnight. Not with XM. The music and news that you want is there 24 hours a day. I think the freedom of choice is important, even if you are willing to pay extra for it. Please reject the NAB's petition 04-160. I don't want anything to come between my XM service and my radio.

Thank you.
